Reading This Chart:

All information for public schools comes from New York State's Accountability and Overview Reports and Comprehensive Information Reports for the 2006-07 year, the most recent data available at press time. The

data for Hunter College Schools were provided by Hunter. **School Size:** For schools that include grades other than 9-12, this number may represent the entire student body, not just the high school grades. **Grade 10 English and Math Class Size:** In high schools, class size is often determined by academic

content and is thus more difficult to generalize. The data we provide represent the range of average sizes for 10th grade English and math classes. When only one number is provided, the average size of 10th grade English and math classes are the same at that particular school. When figures for only one sub-

ject are provided, only that information was included in the New York State Accountability and Overview Report. **Percentage with Regents Exam Score of 65 or More:** This is the percentage of students who scored a 65 or more on the 2006-07 New York State English and Math A Regents exams.

*Hunter College Schools are tuition-free "laboratory" schools created by CUNY and governed by Hunter College. Though bound

by state and some city regulations, they are not directly accountable to the city's Department of Education. Hunter students

do not take the standardized tests administered to other public school students. The class size figure printed here represents the

overall average class size, not just sizes for grade 10 English and math classes. The data reflect grades 7-12.
